

DATASHEET

SKYBOX HEALTH CHECK

Ensure Ongoing, Optimal Performance of Your Skybox Deployment

Skybox® Security is committed to your success. If it's been a while since one of our professional services team has worked with you on your Skybox deployment, we recommend a Skybox Health Check to optimize the value of your Skybox deployment.

Your network has not been standing still — it's been growing and evolving. Periodically checking on the data imports, model status and system operation parameters of your Skybox deployment will ensure optimal performance.

Skybox Professional Services will run through a set of comprehensive checks and provide a detailed report with findings as well as remediation recommendations.

PROGRAM OVERVIEW

Platform Performance

- Check and verify platform parameters such as disk usage, memory usage, CPU performance and other platform settings

SKYBOX HEALTH CHECK KEY FEATURES

- Platform performance
- Data import validation
- Model validation checks
- Operational checks
- Use case and new feature review

[Learn more about Skybox Professional Services >](#)

Data Import Validation

- Verify that all data import tasks are performing properly and completed successfully
- Ensure you are set to receive notifications from the Skybox system for any task issues

Model Validation Checks

- Verify model freshness and look for stale devices not recently imported, which may be a result of network device decommissioning
- Check the basic model for completeness and accuracy issues, such as missing perimeter connections, missing routing rules and other key items
- Verify license usage and alert Skybox if you may be close to needing license expansion

Operational Checks

- Ensure Skybox analysis and reporting tasks are operating properly
- Verify items including user authentication, alerts, model backup and dictionary processing

Use Case and New Feature Review

- Skybox Professional Services will review your product use cases; provide advice and recommendations on how the Skybox platform can provide a solution for new use cases; and provide an overview of new product features

Comprehensive Health Check

- The report will provide details on all findings and list recommendations for remediation

ABOUT SKYBOX SECURITY

Skybox provides the industry's broadest cybersecurity management platform. At Skybox Security, we provide you with cybersecurity management solutions to help your organization innovate rapidly and with confidence. We get to the root of cybersecurity issues, giving you better visibility, context and automation across a variety of use cases. By integrating data, delivering new insights and unifying processes, you're able to control security without restricting operational agility. Skybox's comprehensive solution unites different security perspectives into the big picture, minimizes risk and empowers security programs to move to the next level. With obstacles and complexities removed, you can stay informed, work smarter and drive your organization forward, faster.
