

DATASHEET

SKYBOX END USER

Training Course Overview

Skybox® Security offers customer-tailored, entry-level training courses covering all products within our suite: Skybox Firewall Assurance, Skybox Network Assurance, Skybox Change Manager and Skybox Vulnerability Control. Course topics cover everyday workflows that enhance participants' ability to use Skybox in support of business activities and are reinforced with hands-on experience.

The modular structure of our end-user courses enables customers to receive training only for purchased products and in alignment with deployment schedules.

ATTENDANCE OPTIONS

Skybox offers instructor-led training in both in-person and virtual formats. Virtual training courses are available to accommodate every budget, schedule and personal learning preference. Users can also receive in-person training and a hands-on lab session at their preferred site. For more information on instructor-led courses, please contact your account manager or support@skyboxsecurity.com.

The estimated duration of the course is eight hours or one day.

WHO SHOULD ATTEND

End-user training courses are designed for firewall administrators, security analysts, network operations engineers, compliance officers, security auditors, risk managers, change agents and other similar roles who use Skybox products to perform day-to-day activities. Although no previous experience with Skybox is required to participate, our end-user courses offer a valuable opportunity for experienced users to discover new features and optimize their workflows when working with Skybox.

SKYBOX TRAINING PROGRAMS

Skybox offers training programs for administrators and end users, covering fundamentals to advanced topics to ensure you get the most out of your solution.

- Flexible attendance options
- Thorough training for all skill levels
- Custom course options available

BENEFITS

- Learn how to apply the full value of Skybox Security's solutions for any organization
- Maintain a high level of professional knowledge and technical proficiency
- Gain access to our unique and extensive courseware detailing day-to-day workflows
- Experience real-life scenarios with our extensive training labs

SKYBOX TRAINING LABS

The Skybox Training Labs platform provides customers with a fast, easy and secure method to launch full-featured Skybox practice labs in the cloud. With our platform, each participant gains unparalleled hands-on access to virtual environments from anywhere.

Each participant has instant access to their own dedicated browser-based lab environment. Access is easy and secure, with no software installation required.

COURSE OUTLINE

| TOPIC | DESCRIPTION | AGENDA |
|------------------------------|--|---------------------------|
| Firewall Assurance | Create complex analyses of organizational firewalls, identify hidden risk, track changes, clean and optimize firewall rules and review firewall configuration violations | View > |
| Network Assurance | Explore and inspect the structure of entire networks, identify hidden risk, analyze traffic paths and increase overall visibility into the network attack surface | View > |
| Change Manager | Automate network change management processes, optimize change planning to reduce policy-bloat, identify potential risk and automatically implement and verify changes. | View > |
| Vulnerability Control | Discover, prioritize and remediate hidden vulnerabilities across all organizational assets using unique business context and network metrics | View > |
