

DATASHEET

# SKYBOX FUNDAMENTALS

## Training Course Overview

**Skybox® Security offers a foundational course** to provide an overview of the Skybox features and workflows used for attack surface visibility and risk prioritization across the entire organization. This course will ensure that your team is ready to further the adoption of Skybox solutions using this learning offering from Skybox Online Training.

### [Video: Intro to Skybox Online Training >](#)

The *Skybox Fundamentals - Getting Started with Skybox Manager* course provides participants with an understanding of the technology, architecture and unique capabilities of the Skybox cybersecurity management solution. Learn how to navigate the user interface and review analysis results and compliance policies that enable enhanced attack surface visibility and advanced risk prioritization throughout the organization. Understand how to work with collected data, interpret analysis results and implement changes to the network to increase its security and performance.

Set up in a modular approach, Skybox Online Training allows you to take the entire course or just a portion, depending on your available time and needs. The Skybox Fundamentals course is accessible via desktop, mobile device or tablet — when you need it, where you need it.

Customers can connect to the Skybox [Customer Community Center](#) and access online learning at their own pace by taking advantage of this e-learning course. Our user-friendly, interactive environment provides free, high-quality training on the Skybox cybersecurity management solution.

Note: Free courses are not intended to replace paid end user and certified administrator training courses.

## SKYBOX TRAINING PROGRAMS

Skybox offers training programs for administrators and end users, covering fundamentals to advanced topics to ensure you get the most out of your solution.

- Flexible attendance options
- Thorough training for all skill levels
- Custom course options available

## HOW TO ENROLL

Access to the Skybox Online Training portal requires an existing registration to our Customer Community Center. If you are already registered, you may log in to the Customer Community Center and access Skybox Online Training by clicking the Training tab at the top of the page.

If you are not yet registered, please fill-out the [self-registration form](#) and a Customer Care agent will promptly handle your request. Feel free to contact us at [Customer.Training@skyboxsecurity.com](mailto:Customer.Training@skyboxsecurity.com) for any inquiries.

## WHO SHOULD ATTEND

- Security professionals and IT engineers that are new to the Skybox solution and are looking to get acquainted with Skybox concepts and features
- Experienced Skybox users looking for a refresher on entire topics or specific lessons

## BENEFITS

- Improve the skills and knowledge of your security and network professionals to combat increasing threats and build credibility within your organization
- Gain easy access to information
- Learn when and where you want
- Reduce learning time
- Enjoy modular learning — take all lessons sequentially or directly access specific lessons
- Complete online assessments to test your knowledge

# COURSE OUTLINE

TOPIC	DESCRIPTION	DURATION
<b>Introduction</b>	The lessons provide a high-level overview of Skybox Security and its cybersecurity management solution.	15 minutes
<b>Firewall and Network Assurance</b>	The lessons cover Firewall and Network Assurance and demonstrate how users can leverage these solutions to: <ul style="list-style-type: none"><li>• Gain end-to-end visibility into organizational networks</li><li>• Detect hidden risk</li><li>• Increase operational efficiency</li><li>• Track changes across all firewalls</li></ul>	65 minutes

## ABOUT SKYBOX SECURITY

Skybox provides the industry's broadest cybersecurity management platform. At Skybox Security, we provide you with cybersecurity management solutions to help your organization innovate rapidly and with confidence. We get to the root of cybersecurity issues, giving you better visibility, context and automation across a variety of use cases. By integrating data, delivering new insights and unifying processes, you're able to control security without restricting operational agility. Skybox's comprehensive solution unites different security perspectives into the big picture, minimizes risk and empowers security programs to move to the next level. With obstacles and complexities removed, you can stay informed, work smarter and drive your organization forward, faster.
