

Are you exposing your organization to cyber risk through blind change management?

60%

of breaches involved un-remediated vulnerabilities¹

SEE

Skybox pulls data from across your enterprise and builds it into a dynamic, accurate model of your infrastructure and its exposures.

Now, no risk goes unnoticed.

95%

of cybersecurity breaches are due to human error²

KNOW

Make rule and policy changes with full contextual understanding of your security and network infrastructure, and verify their efficacy before deploying them.

This is the power of context-aware change management.

69%

of executives say pre-empting attacks is a constant battle³

ACT

Tighten the security measures that protect your organization with a single platform that brings together the decision-making process for enterprise security and network teams.

Reduce systemic risk and stay compliant.

With Skybox Security, you can see around corners, and intelligently plan your response.
