- + **Elite 80 Private Company,** JMP Securities 2022 Elite 80

### Management team

- + **CEO** | Mordecai Rosen
- + **Chief Financial Officer** | Todd Hollands
- + **Chief Revenue Officer** | Jay Zimmet
- + **Chief Marketing Officer** | Corey Williams
- + **Chief Information and Security Officer** | Ami Ben-Dror
- + **CTO and VP, Engineering** | Ron Davidson
- + **VP, Product Management** | Adi Dubin
- + **VP, Customer Care** | Gautam Sundararajan
- + **Chief People Officer** | Paula Ewanich

### Skybox Continuous Exposure Management Platform

The Skybox Continuous Exposure Management platform powers a proactive and comprehensive approach to cybersecurity that continuously identifies, prioritizes, and mitigates potential cyber threats and vulnerabilities across your hybrid attack surface.

### The secret sauce

The Skybox platform aggregates essential data from a wide range of security, cloud, and network technologies to generate a dynamic security model that visualizes all network configurations, vulnerabilities and exposures, and security controls. With the model, we conduct exposure analysis to determine which attack vectors or network paths could be used to gain access to vulnerable systems. Then we uniquely prioritize exposures based on risk factoring in severity, exploitability, asset importance, and asset exposure. You then choose from the best remediation options based on risk and business impact assessments.

### Strategic technology alliances and partners

Skybox has a deep bench of MSSP, GSI, reseller and distributor partners along with strategic technology alliances. We have integrations across the widest range of security, cloud, and network technologies in the industry. These integrations allow us to automatically collect, merge, model, and analyze data from these disparate products to provide you with a complete picture of your attack surface.
