

TRAINING PROGRAM OVERVIEW

Online Training

Self-paced, free, modular learning paths

Skybox Security offers multiple foundational learning paths that provide an overview of the Skybox Continuous Exposure Management Platform's features and workflows to leverage attack surface visibility and risk prioritization across the organization, and enable teams to further the adoption of Skybox solutions. The Skybox Online Training learning paths are user-friendly, interactive, and modular: providing the option to take entire courses or just a portion, depending on your needs and available time.

The **Online Training** learning paths **are free** to all Skybox customers, and are available via desktop, mobile, or tablet on the Skybox Training portal: training.skyboxsecurity.com.

Online Training does not yield a certification, and is not intended to replace (paid) Instructor-led **Certifying Training Courses** for End-Users or Administrators. [Learn more about Certifying Training Courses.](#)

Who Should Attend

- Security professionals and IT engineers that are new to the Skybox platform and are looking to get acquainted with Skybox concepts and features.
- Experienced Skybox users looking for a refresher on entire topics or specific lessons.

Benefits

- Learn at your own pace, when and where you want: take all lessons sequentially, or access specific lessons directly.
- Security and network professionals can improve their skills and knowledge: learn how to combat increasing threats, and build credibility within your organization.
- Utilize online assessments to test your knowledge and prepare for Certifying Training Courses.

Skybox Foundational Learning Paths:

The **Skybox Fundamentals** learning path describes the Skybox Continuous Exposure Management Platform's technology, architecture, and unique capabilities. Learn how to navigate the user interface and review analysis results and compliance policies that enable enhanced attack surface visibility and advanced risk prioritization throughout the organization. Understand how to work with collected data, interpret analysis results, and implement changes to the network to increase its security and performance.

The **Skybox Assurance** learning path contains a collection of introductory-level courses aimed at providing the concepts & theory required to familiarize yourself with the various analyses and features found in Skybox Firewall Assurance & Network Assurance.

The **Skybox Vulnerability Management** learning path contains a collection of introductory-level courses aimed at providing the concepts & theory required to familiarize yourself with the various analyses and features found in Skybox Vulnerability Control.

The **Operation & Maintenance** learning path covers everyday administrative tasks in Skybox.

How to enroll and access Online Training

Access to the [Skybox Online Training](#) portal requires an existing registration to our [Customer Support Community](#). If you are already registered, you may log in directly to [Skybox Online Training](#) or through the [Customer Support Community](#) first and then click the Training & Certification button.

- View a brief [video introduction to the Customer Support and Training portals](#).

If you are not yet registered, please fill out the [self-registration form](#), and a Customer Care agent will promptly handle your request. Feel free to contact us at Customer.Training@skyboxsecurity.com for any inquiries.
