

SELF-PACED TRAINING OVERVIEW

Skybox Online Training

Skybox Security offers multiple foundational learning paths to provide an overview of the Skybox features and workflows used for attack surface visibility and risk prioritization across the entire organization. These learning paths will ensure that your team is ready to further the adoption of Skybox solutions using this learning offering from **Skybox Online Training**.

The **Skybox Fundamentals** learning path provides participants with an understanding of the technology, architecture and unique capabilities of the Skybox cybersecurity management solution. Learn how to navigate the user interface and review analysis results and compliance policies that enable enhanced attack surface visibility and advanced risk prioritization throughout the organization. Understand how to work with collected data, interpret analysis results and implement changes to the network to increase its security and performance.

The **Skybox Assurance** learning path contains a collection of introductory level courses aimed at providing the concepts & theory required to familiarize yourself with the various analyses and features found in the Skybox Firewall & Network Assurance modules.

The **Skybox Vulnerability Management** learning path contains a collection of introductory level courses aimed at providing the concepts & theory required to familiarize yourself with the various analyses and features found in the Skybox Vulnerability Control module.

The **Operation & Maintenance** learning path covers common administrative tasks in the Skybox appliance.

Set up in a modular approach, Skybox Online Training allows you to take entire courses or just a portion, depending on your available time and needs. The Skybox Online Training self-paced courses are accessible via desktop, mobile device or tablet— when you need it, where you need it.

Customers can connect to the [Customer Community Center](#) and access online learning at their own pace by taking advantage of these e-learning courses. Our user-friendly, interactive environment provides free, high-quality training on the Skybox cybersecurity management solution.

*Free courses are not intended to replace paid End-User & Certified Administrator training courses.

How to Enroll

Access to the Skybox Online Training portal requires an existing registration to our [Customer Community Center](#). If you are already registered, you may login to the [Customer Community Center](#) and access Skybox Online Training by clicking the Training tab at the top of the page.

If you are not yet registered, please fill-out the [self-registration form](#) and a Customer Care agent will promptly handle your request. Feel free to contact us at Customer.Training@skyboxsecurity.com for any inquiries.
